

Mia

Set amidst the cascading serenity of lush tropical rain forests and a clear shimmering beach enclave, Villa Mia brings you a captivating natural paradise embodied in fascinating style. Truly a perfect combination of ocean, mountains and foliage with the best view of the Bay, this waterfront villa is 15 km south of downtown, where the natural resources gave a delightful kaleidoscope of endless natural flora and fauna once used as scenes for the Hollywood movies "Night of the Iguana" and "The Predator", among others.

Be spellbound by breathtaking panoramic views of Banderas Bay, the spacious and open *palapa* living room, round dining area and old Mexican style kitchen with clay oven. 14 luxury bedrooms, one double suite and master bedroom with Jacuzzi, fireplace and steam room all overlook the Pacific ocean. Four huge terraces, one with a large *palapa* bar on the recreation area, make a unique design statement for special events, weddings, or corporate dream vacations. A large swimming pool, warm heart-shaped Jacuzzi accommodating 16, private squash court, BBQ and bonfire area with the ocean and magnificent rocks at front as a sentinel to its privacy and solitude call you to be one of the prestigious few to discover the gateway to the heart of paradise.
